Years 7–8 assessment techniques and conditions

The Arts — Media Arts

This document outlines assessment techniques and response conditions to achieve range and balance within an assessment program. Schools consider the local context, and the age and capabilities of the students, when selecting appropriate assessment techniques and response conditions.

Techniques	Extended response	Practical and/or performance	Examination
Description	An extended response assesses students' abilities to explore, respond to, identify and analyse their own media artworks either before, during or after their making, or in response to the media artworks of others.	A practical and/or performance assesses students' abilities when making media artworks.	An examination assesses students' responses that are produced independently, under supervised conditions and in a set timeframe. An examination ensures student authorship.
	 An extended response focuses on the responding strand and requires students to: identify and analyse how representations of social values and points of view are portrayed in media artworks evaluate how they and other makers and users of media artworks from different cultures, times and places use genre and media conventions and technical and symbolic elements to make meaning identify and analyse the social and ethical responsibility of the makers and users of media artworks. 	A practical and/or performance focuses on the making strand and requires students to apply design, production and distribution processes to demonstrate: • use of genre and media conventions, and shaping of technical and symbolic elements for specific purposes and meaning • production of representations that communicate social values and points of view in media artworks. During the making of media artworks, students require access to cameras and editing equipment.	An examination requires students to respond to one or more assessment items. These items are based on questions or tasks that are typically unseen. Questions or tasks may be based on stimulus material. Stimulus materials may be seen or unseen. • Seen questions, statements or stimulus materials should be provided with sufficient time for students to adequately engage with the materials. • Unseen questions, statements or stimulus materials should not be copied from information or texts that students have previously been exposed to, or have directly used, in class.
Formats (examples only)	Responding formats include: • written - annotated storyboard, pictures, diagrams, sketches and/or photographs - reflective journal entry - short response - critique/review/article for magazine or journal	Making formats include:	Formats include: • short response items - paragraph response - simple description or explanation • extended response items - essay

Conditions	Suggested length:* Responding to own work/making • written responses 200–300 words • spoken/signed responses 45 seconds— 1 minute • multimodal responses 45 seconds— 1½ minutes. Responding to work of others • written responses 300–400 words • spoken/signed responses 45 seconds— 1½ minutes • multimodal responses 1–2 minutes.	Suggested length:* Making • treatments 300–400 words • storyboards 6–10 shots • scripts 45 seconds–1½ minutes • moving image media productions 30–45 seconds.	Suggested time: • up to 70 minutes, plus 10 minutes perusal. Suggested length:* • 100–300 words.

Notes

Responses may be written, spoken/signed or multimodal (integrating visual, print and/or audio features), recorded or live.

*Length of student responses should be considered in the context of the assessment. Longer responses do not necessarily provide better quality evidence of achievement.
