## Sequence of literacy progressions

This resource presents a sequence of literacy progressions for all elements of the Literacy general capability. It is organised by the elements, sub-elements and their progression levels of the Literacy general capability.

For each sub-element, detailed, observable, evidence-based indicators of literacy development are provided. The indicators can be used to support students to successfully engage with the literacy demands across all learning areas of the Australian Curriculum v9.0. Students may simultaneously display indicators from two or more progression levels within a sub-element.

The indicators support teachers to:

- identify the current knowledge, skills and dispositions of individuals and groups of students
- identify subsequent knowledge, skills and dispositions that could be taught to support continued literacy development
- plan for meaningful experiences which target specific literacy needs of students
- establish clear and explicit literacy learning goals for individuals and groups of students.

For more detailed advice about the structure and use of the Literacy general capability, see the QCAA resource [Literacy general capability \(qcaa.qld.edu.au\)](https://qcaa.qld.edu.au/literacy-general-capability).

## Speaking and Listening

Table 1 provides an overview of the alignment between levels of the Speaking and Listening literacy progression and year levels of the Australian Curriculum v9.0: English. Teachers can use this table to identify which level/s of the progressions typically align to each year level. The number of progression levels differs between sub-elements and is determined by research evidence. In some cases, multiple progression levels can be found within a single English curriculum year level.

## Writing

Table 3 provides an overview of the alignment between levels of the Writing literacy progression and year levels of the Australian Curriculum v9.0: English. Teachers can use this table to identify which level/s of the progressions typically align to each year level. The number of progression levels differs between sub-elements and is determined by research evidence. In some cases, multiple progression levels can be found within a single English curriculum year level.
