

Years 9–10 (P–10 sequence) standard elaborations — Australian Curriculum v9.0: Japanese

Purpose

The standards elaborations (SEs) support teachers to connect curriculum to evidence in assessment so that students are assessed on what they have had the opportunity to learn. The SEs can be used to:

- make consistent and comparable judgments, on a five-point scale, about the evidence of learning in a folio of student work across a year/band
- develop task-specific standards (or marking guides) for individual assessment tasks
- quality assure planning documents to ensure coverage of the achievement standard across a year/band.

Structure

The SEs have been developed using the Australian Curriculum achievement standard. The achievement standard for Japanese describes what students are expected to know and be able to do at the end of each year/band. Teachers use the SEs during and at the end of a teaching period to make on-balance judgments about the qualities in student work that demonstrate the depth and breadth of their learning.

In Queensland, the achievement standard represents the C standard — a sound level of knowledge and understanding of the content, and application of skills. The SEs are presented in a matrix where the discernible differences and/or degrees of quality between each performance level are highlighted. Teachers match these discernible differences and/or degrees of quality to characteristics of student work to make judgments across a five-point scale.

Years 9–10 (P–10 sequence) Australian Curriculum: Japanese achievement standard

By the end of Year 10, students contribute to and extend interactions in Japanese language in increasingly unfamiliar contexts related to a wide range of interests and issues. They interpret texts by evaluating and synthesising information, ideas and perspectives. They show understanding of how features of language can be used to influence audience response. They create texts, selecting and manipulating language for a range of contexts, purposes and audiences. They apply and use complex sentences and structures to create and respond to spoken and written texts. They use a variety of tenses to sequence events and use language devices to enhance meaning and cohesion. They select and use combinations of kana and a range of kanji appropriate to context.

Students incorporate features, conventions and phrasing patterns of spoken Japanese in informal and formal speech, to extend fluency. They demonstrate understanding of the conventions of spoken and written texts and the connections between them. They apply knowledge of scripts, language structures and features, to make and predict meaning. They identify multiple readings of familiar kanji in different compounds. They support analysis of Japanese texts using metalanguage. They reflect on their own cultural perspectives and identity, and draw on their experience of learning Japanese, to evaluate how this learning influences their ideas and ways of communicating.
