

Prep–Year 10 Chinese

Australian Curriculum Version 9.0: Sequence of achievement standards

The table below provides a sequence of achievement standards for Prep–Year 10 Chinese, organised by the strands. A similar resource is available for Years 7–10 Chinese (Year 7 entry sequence).

	Prep	Years 1–2 band	Years 3–4 band	Years 5–6 band	Years 7–8 band	Years 9–10 band
Communicating meaning in Chinese	By the end of the Prep year, students use play and imagination to interact and create Chinese texts, with support.	By the end of Year 2, students use Chinese language to interact and share information related to the classroom and themselves. They use cues to respond to questions and instructions, and use simple formulaic language. They locate and convey key items of information in texts using non-verbal, visual and contextual cues to help make meaning. They use familiar words and modelled language to create text. They copy some familiar characters and Pinyin.	By the end of Year 4, students use Chinese language to initiate structured interactions to share information related to the classroom and their personal world. They use modelled language to participate in spoken and written activities that involve planning. They locate and respond to key items of information in texts using strategies to help interpret and convey meaning in familiar contexts. They use modelled language and basic syntax to create texts. They use familiar characters appropriate to context and make connections with the spelling and tone marks of Pinyin.	By the end of Year 6, students initiate and use strategies to maintain interactions in Chinese language that are related to their immediate environment. They use key features of pronunciation and intonation, recognising stress and phrasing in spoken texts. They collaborate in spoken and written activities that involve the language of planning and problem-solving to share information, ideas, and preferences. They use strategies to locate and interpret information and ideas in texts, and demonstrate understanding by responding in Chinese or English, adjusting their response to context, purpose and audience. They create texts, selecting and using a variety of vocabulary and sentence structures to suit context. They sequence information and ideas, and use conventions appropriate to text type. They use familiar characters appropriate to context and Pinyin.	By the end of Year 8, students initiate and maintain interactions in Chinese language in familiar and some unfamiliar contexts related to a range of interests and experiences. They use Chinese to collaborate and problem-solve, and adjust language in response to others. They interpret information, ideas and opinions in texts. They demonstrate understanding of similarities and differences between languages, in both familiar and some unfamiliar cultural contexts, by adjusting and reorganising responses. They select and use vocabulary, sentence structures, expressions and levels of formality, to create texts. They select and use characters appropriate to context and begin to use Pinyin to transcribe spoken words and short modelled sentences.	By the end of Year 10, students contribute to and extend interactions in Chinese language in increasingly unfamiliar contexts related to a wide range of interests and issues. They interpret texts by evaluating and synthesising information, ideas and perspectives. They show understanding of how features of language can be used to influence audience response. They create texts, selecting and manipulating language for a range of contexts, purposes and audiences. They apply and use complex sentences and structures to create and respond to spoken and written texts. They use a variety of tenses to sequence events and use language devices to enhance meaning and cohesion. They select and use a variety of characters appropriate to context, using Pinyin to transcribe spoken texts.
Understanding language and culture	They identify that Chinese and English look and sound different. They recognise that there are languages and cultures as well as their own, and that aspects of language and culture contribute to their own and others' cultural identity.	Students imitate the sounds, tones and rhythms of Chinese. They demonstrate understanding that Chinese has rules for non-verbal communication, pronunciation and writing, and that characters are a form of writing and Pinyin reflects the sounds of spoken Chinese. They give examples of similarities and differences between some features of Chinese and English. They understand that language is connected with culture, and notice how this is reflected in their own language(s) and culture(s).	Students imitate sounds, tones, pronunciation, and intonation patterns of Chinese language. They demonstrate understanding that Chinese has non-verbal, spoken and written language conventions and rules to create and make meaning. They recognise that some terms have cultural meanings. They identify patterns in Chinese and make comparisons between Chinese and English. They understand that the Chinese language is connected with culture, and identify how this is reflected in their own language(s) and culture(s).	Students apply rules for pronunciation and intonation, writing, character formation, punctuation and modelled structures, when creating and responding in Chinese. They compare language structures and features in Chinese and English, using some metalanguage. They show understanding of how some language reflects cultural practices and consider how this is reflected in their own language(s), culture(s) and identity.	Students apply the conventions of spoken Chinese, including differences in sounds and tones, to develop fluency and demonstrate understanding of writing system features and the role and function of character components. They demonstrate understanding that spoken, written and multimodal texts use different conventions, features and linguistic structures to convey meaning. They comment on structures and features of Chinese text, using metalanguage. They reflect on how the Chinese language, culture(s) and identity are interconnected, and compare this with their own language(s), culture(s) and identity.	Students incorporate features, conventions and phrasing patterns of spoken Chinese including variations in intonation, rhythm and sounds, to enhance fluency. They demonstrate understanding of the conventions of spoken and written texts and the connections between them. They apply knowledge of grammar and character form and function, and language structures and features, to make and predict meaning. They support analysis of Chinese texts, using metalanguage. They reflect on their own cultural perspectives and identity, and draw on their experience of learning Chinese, to evaluate how this learning influences their ideas and ways of communicating.
