

Assessable elements Task-specific assessable elements	Task-specific descriptors				
	A	B	C	D	E
Knowledge and understanding Investigating and designing Generates design ideas	Generates three realistic designs that match requirements.		Generates two realistic designs that match requirements.	Generates one design that may match requirements.	
Producing Plans and sequences main steps in the production of a bag	Production plan is well-considered with detailed information. Information in main steps is detailed and sequence is logical.	Production plan is thoughtful with practical information. Information in main steps is relevant and sequence is logical.	Production plan has credible information. Information in main steps and sequence are credible.	Production plan has limited information but does provide direction. Information in main steps is limited but sequence is satisfactory.	Production plan has fragmented information that provides little direction. Information in main steps is fragmented and not sequenced.
Knowledge and understanding Producing Uses materials, tools and techniques in bag production	Tools and techniques are skilfully used to manipulate materials. Understands the need for safety and consistently applies safe practices.	Tools and techniques are effectively used to manipulate materials. Understands the need for safety and regularly applies safe practices.	Tools and techniques are adequately used to manipulate materials. Understands the need for safety and sometimes applies safe practices.	Tools and techniques are used with significant assistance to manipulate materials. Understands the need for safety but application is inconsistent.	An attempt is made to use tools and techniques to manipulate materials. Understands the need for safety but application is rare.
Evaluating Reflecting Individually evaluates bag and reflects on learning	Reflection is detailed and insightful.	Reflection is detailed and thoughtful.	Reflection is credible and obvious.	Reflection is narrow.	Reflection is attempted.
