## External assessment 2022

## Question and response book

## General Mathematics

## Paper 2

## Time allowed

- Perusal time - 5 minutes
- Working time - 90 minutes

## General instructions

- Answer all questions in this question and response book.
- Write using black or blue pen.
- QCAA-approved scientific calculator permitted.
- QCAA formula book provided.
- Planning paper will not be marked.

## Section 1 (38 marks)

- 7 short response questions

## Section 1

## Instructions

- Questions worth more than one mark require mathematical reasoning and/or working to be shown to support answers.
- If you need more space for a response, use the additional pages at the back of this book.
- On the additional pages, write the question number you are responding to.
- Cancel any incorrect response by ruling a single diagonal line through your work.
- Write the page number of your alternative/additional response, i.e. See page ...
- If you do not do this, your original response will be marked.

Question 1 (4 marks)
The table shows a swimwear company's seasonally
adjusted swimsuit sales (in thousands).

|  | Season |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Spring | Summer | Autumn | Winter |
| Seasonally <br> adjusted <br> swimsuit sales <br> (in thousands) | 33.3 | 34.8 | 36.4 | 35.8 |

The long-term seasonal indices for spring, summer and
winter are $1.11,1.42$ and 0.62 respectively.
Determine the actual swimsuit sales for autumn.

## Question 2 (5 marks)

Tam deposits a fixed amount at the end of each month into an account paying 8.6\% p.a. compounding monthly. From an initial zero balance, she accumulates $\$ 51343.85$ in four years.
A financial planner has advised Tam that she would have been at least $\$ 3000$ better off if she had instead deposited half of the fixed amount at the end of each fortnight into an account paying 7.9\% p.a. compounding fortnightly.
Evaluate the reasonableness of this advice.

## Question 3 (5 marks)

In a company's first 10 years of operation, the average annual profit ( $\bar{y}$ ) was $\$ 9660$ with a standard deviation $\left(s_{y}\right)$ of $\$ 3010$. Fitting a least-squares line to the data comparing annual profit ( $y$ ) to the year of operation ( $x$ ) produced a correlation coefficient of 0.9987 . Show that the predicted profit, to the nearest dollar, for this company in the 11th year of operation will be $\$ 15121$.

| Question 4 (5 marks) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| The table shows the current road length (in kilometres) between six towns. |  |  |  |  |  |  |
|  | Manon | Veria | Bolint | Farra | Recen | Alin |
| Manon |  | 16 | 34 | - | - | 33 |
| Veria |  |  | 12 | - | - | 15 |
| Bolint |  |  |  | - | 10 | - |
| Farra |  |  |  |  | 15 | 23 |
| Recen |  |  |  |  |  | 15 |
| Alin |  |  |  |  |  |  |
| The government plans to build a direct road between Manon and Farra. Use a network diagram to determi the length of the direct road if it is to be 4 km shorter the length of the current shortest road route between Manon and Farra. |  |  |  |  |  |  |

Question 5 ( 5 marks)
The map details the length (in metres) of paths between
nine key locations in a theme park. The annual cost to
maintain the paths is $\$ 214$ per metre. The theme park
manager believes at least $\$ 138000$ can be saved each
year if some paths are removed, while still allowing visitors
to access every key location using paths.

## Question 6 (7 marks)

The first three lines in a pattern have the equations given. Their slopes form the terms of one sequence and their $y$-intercepts form the terms of another sequence. Each sequence is either arithmetic or geometric.
Line 1: $y=-0.8 x+1.2$
Line 2: $y=0.4 x+2.7$
Line 3: $y=-0.2 x+4.2$
Determine the coordinates of the point where Line 5 in the pattern intersects Line 1.
