Question and response book

# Specialist Mathematics

## Paper 1 — Technology-free

### Time allowed

- Perusal time — 5 minutes
- Working time — 90 minutes

### General instructions

- Answer all questions in this question and response book.
- Calculators are **not** permitted.
- QCAA formula book provided.
- Planning paper will not be marked.

### Section 1 (10 marks)

- 10 multiple choice questions

### Section 2 (55 marks)

- 9 short response questions

# Section 1

## Instructions

- Choose the best answer for Questions 1–10.
- This section has 10 questions and is worth 10 marks.
- Use a 2B pencil to fill in the A, B, C or D answer bubble completely.
- If you change your mind or make a mistake, use an eraser to remove your response and fill in the new answer bubble completely.

|          | A                                | B                     | C                     | D                     |
|----------|----------------------------------|-----------------------|-----------------------|-----------------------|
| Example: | <input checked="" type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

---

|     | A                     | B                     | C                     | D                     |
|-----|-----------------------|-----------------------|-----------------------|-----------------------|
| 1.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 2.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 3.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 4.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 5.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 6.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 7.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 8.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 9.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| 10. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

Do not write outside this box.

## Section 2

### Instructions

- Write using black or blue pen.
  - Questions worth more than one mark require mathematical reasoning and/or working to be shown to support answers.
  - If you need more space for a response, use the additional pages at the back of this book.
    - On the additional pages, write the question number you are responding to.
    - Cancel any incorrect response by ruling a single diagonal line through your work.
    - Write the page number of your alternative/additional response, i.e. See page ...
    - If you do not do this, your original response will be marked.
  - This section has nine questions and is worth 55 marks.
- 

**DO NOT WRITE ON THIS PAGE**

**THIS PAGE WILL NOT BE MARKED**

Do not write outside this box.

### QUESTION 11 (7 marks)

The vertices of a regular hexagon are positioned on the circumference of a unit circle as shown on the Argand plane.

Consider the complex number  $w$ , as shown on the plane.

- a) Determine  $w$ , expressing your answer in the form  $r \operatorname{cis}(\theta)$ .

[1 mark]

---

---

---

- b) Convert  $w$  into Cartesian form.

[2 marks]

---

---

---

---

Do not write outside this box.

Each vertex of the hexagon is a solution of an equation of the form  $z^n = a$  where  $z \in \mathbb{C}$ .

c) State the value of  $n$ . *[1 mark]*

---

---

d) State the value of  $a$ . *[1 mark]*

---

---

e) Verify that  $w$  satisfies the equation  $z^n = a$  using the results from 11c) and 11d). *[2 marks]*

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

**QUESTION 12 (8 marks)**

Consider the vertices A, B and C of the rectangular prism as shown.

- a) State the coordinates of A, B and C.

[1 mark]

---

---

---

- b) Determine a unit vector,  $\hat{n}$ , that is normal to the plane containing A, B and C.

[3 marks]

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

c) Verify that  $\hat{n}$  is perpendicular to  $\overrightarrow{AB}$ .

[2 marks]

d) Determine the Cartesian equation of the plane that contains A, B and C.

[2 marks]

Do not write outside this box.

**QUESTION 13 (4 marks)**

The expected value of an exponential random variable  $X$  with parameter  $\lambda > 0$  can be determined using the rule

$$E(X) = \int_0^\infty x\lambda e^{-\lambda x} dx$$

Use integration by parts to determine  $E(X)$ .

Express your answer in simplest form.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

**QUESTION 14 (4 marks)**

The motion of an object that moves in a straight line is given by  $v(x) = \cos^{-1}(2x)$  where  $v$  is the velocity ( $\text{m s}^{-1}$ ) and  $x$  is the displacement (m) from the origin.

- a) Determine  $a(x)$  where  $a$  is the acceleration ( $\text{m s}^{-2}$ ) of the object. *[2 marks]*

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

- b) Use the result from 14a) to determine  $a(0)$ , given  $-2\pi \leq a(0) \leq 0$ . Express your answer in simplest form. *[2 marks]*

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

**QUESTION 15 (6 marks)**

The points  $O(0, 0, 0)$ ,  $A(-6, 2, -2)$  and  $C(3, 1, 2)$  are represented in three-dimensional space in the diagram.

OABC forms a parallelogram in three-dimensional space.

- a) Determine the coordinates of B.

[1 mark]

---

---

---

M is the midpoint of BC.

- b) Determine the vector that represents  $\overrightarrow{OM}$ .

[1 mark]

---

---

---

---

---

Do not write outside this box.

N divides AM in the ratio 2:1.

c) Determine the vector that represents  $\overrightarrow{ON}$ .

[2 marks]

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

d) Use a vector method to show that O, B and N lie on a straight line.

[2 marks]

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

**QUESTION 16 (6 marks)**

Given  $\cos(\theta) \neq 0 \forall n \in \mathbb{Z}^+$ , use mathematical induction to prove

$$\cos(\theta) - \cos(3\theta) + \cos(5\theta) - \dots + (-1)^{n+1} \cos((2n-1)\theta) = \frac{1 - (-1)^n \cos(2n\theta)}{2 \cos(\theta)}$$

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

A large rectangular area containing 25 horizontal lines, intended for writing.

Do not write outside this box.

**QUESTION 17 (7 marks)**

Determine the smallest positive value of  $a$  given

$$\int_{-a}^a 1 + \left( \frac{\sec(2x) + \tan(2x)}{\operatorname{cosec}(2x) + 1} \right)^2 dx = 1$$

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

A large rectangular area containing 25 horizontal lines, intended for writing.

Do not write outside this box.

**QUESTION 18 (6 marks)**

Consider the function  $P(z) = 2z^4 + az^3 + 6z^2 + az + b$  where  $a, b \in \mathbb{Z}^+$

One of the roots of  $P(z)$  is  $z = -i$

Determine the possible value/s for  $a$  and  $b$  such that all remaining roots of  $P(z)$  have an imaginary component.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

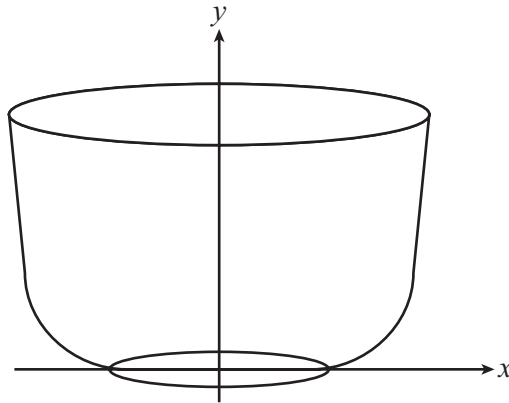

A large rectangular area containing 25 horizontal lines, intended for writing.

Do not write outside this box.

**QUESTION 19 (7 marks)**

A circular-based bowl has been positioned symmetrically on a Cartesian plane as shown in the diagram.

The bowl has a shape that can be generated by rotating the curve  $y = \frac{4}{8-x} - 1$  about the  $y$ -axis for  $4 \leq x \leq 7.6$  cm.

The bowl is being filled with a liquid at the rate of  $7\pi \text{ cm}^3 \text{ s}^{-1}$ .

Determine the rate at which the depth of liquid is increasing when the depth of liquid reaches one-third of the height of the bowl.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.

Lined writing area with 25 horizontal lines.

**END OF PAPER**

Do not write outside this box.

**ADDITIONAL PAGE FOR STUDENT RESPONSES**

Write the question number you are responding to.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

Do not write outside this box.
