Question and response book

Biology

Paper 2

Time allowed

- Perusal time — 10 minutes
- Working time — 90 minutes

General instructions

- Answer all questions in the question and response book.
- Type responses in text fields.
- QCAA-approved calculator permitted.
- Planning paper will not be marked.

Section 1 (45 marks)

- 11 short response questions

DO NOT WRITE ON THIS PAGE

THIS PAGE WILL NOT BE MARKED

Section 1

Instructions

- If you need more space for a response, use the additional pages at the back of this book.
 - On the additional pages, write the question number you are responding to.
 - Type the page number of your alternative/additional response, i.e. See page ...
 - If you do not do this, your original response will be marked.
-

THIS PAGE WILL NOT BE MARKED

Do not write outside this box.

QUESTION 1 (3 marks)

This phylogenetic tree uses horizontal distance to represent genetic difference.

a) Infer which species is most closely related to species B. Explain your reasoning. [2 marks]

b) Determine the genetic difference between species A and D. [1 mark]

QUESTION 2 (4 marks)

This is a biomass pyramid for a grassland community.

a) Calculate the percentage energy transfer between the first two trophic levels. Show your working. [2 marks]

b) Explain the loss of biomass between trophic levels. [2 marks]

QUESTION 3 (4 marks)

A glacier has retreated, leaving a large amount of gravel, small rocks, sand and mud.

a) Explain the steps of succession that would occur if the glacier continues to retreat. [3 marks]

b) Identify the type of ecological succession. [1 mark]

QUESTION 4 (1 mark)

Define *keystone species*.

Do not write outside this box.

QUESTION 5 (5 marks)

a) Describe the roles of messenger RNA and transfer RNA in protein synthesis. [2 marks]

b) Explain how transcription factors control cell differentiation, using an example. [3 marks]

Do not write outside this box.

QUESTION 6 (5 marks)

An environmental report identified overexploitation, habitat destruction and pollution as human activities affecting biodiversity in Australia. The tables show the estimated impact of each activity in 2011 and 2016.

Human activities	2011						2016					
	Assessment grade				Confidence		Assessment grade				Confidence	
	Very high impact	High impact	Low impact	Very low impact	In grade	In trend	Very high impact	High impact	Low impact	Very low impact	In grade	In trend
Over-exploitation												
Habitat destruction												
Pollution												

Recent trends	Grade	Confidence
Improving	<p>Very low impact: Few, if any, species and/or ecosystems are suffering substantial adverse effects from this pressure</p> <p>Low impact: A small proportion of species and/or ecosystems are suffering substantial adverse effects from this pressure</p> <p>High impact: A significant proportion of species and/or ecosystems are suffering substantial adverse effects from this pressure</p> <p>Very high impact: A large proportion of species and/or ecosystems are suffering substantial adverse effects from this pressure</p>	Adequate: Adequate high-quality evidence and high level of consensus
Getting worse		Somewhat adequate: Adequate high-quality evidence or high level of consensus
Stable		Limited: Limited evidence or limited consensus
		Very limited: Limited evidence and limited consensus

Do not write outside this box.

a) Explain how one human activity identified in the tables could reduce biodiversity. [1 mark]

b) Predict which human activities will have the highest and lowest impact on biodiversity in 2023. Explain your reasoning using evidence from the tables. [4 marks]

Highest impact:

Lowest impact:

Do not write outside this box.

QUESTION 7 (6 marks)

The graph shows the population of bacteria in a Petri dish over time.

a) Identify the mode of population growth.

[1 mark]

b) Determine the carrying capacity under these conditions.

[1 mark]

Do not write outside this box.

Conditions were modified at 380 minutes and the population continued to be monitored. Results are shown.

c) Identify two modifications that could cause this change. Explain your reasoning.

[4 marks]

Do not write outside this box.

QUESTION 8 (3 marks)

Over time, the South African cheetah population has suffered drastic reduction due to periodic droughts, disease and hunting. Currently, only small, isolated populations of cheetahs exist in the wild. Explain, in terms of genetic diversity, why cheetah populations are now on the verge of extinction.

Do not write outside this box.

QUESTION 9 (3 marks)

The biological species concept defines *species* as a group of organisms that can interbreed to produce fertile offspring.

a) Identify another method for defining a *species*. [1 mark]

b) Describe one limitation of the biological species concept and one limitation of the method identified in Question 9a). [2 marks]

Do not write outside this box.

QUESTION 10 (3 marks)

In fruit flies, eye colour is a sex-linked trait inherited on the X chromosome. The red-eye allele (R) is dominant over the white-eye allele (r). A red-eyed male and white-eyed female have 50 offspring.

Use a Punnett square to predict the number of male and female offspring and their eye colour.

QUESTION 11 (8 marks)

Allele frequencies were monitored in two large populations of field mice from neighbouring forests over a 10-year period. Results are shown.

Forest X

Year	Genotype			Allele frequency	
	AA	Aa	aa	A	a
2013	52	146	102	0.42	0.58
2014	48	144	108	0.40	0.60
2015	55	147	98	0.43	0.57
2016	60	150	90	0.45	0.55
2017	58	142	100	0.43	0.57
2018	58	148	94	0.44	0.56
2019	59	152	89	0.45	0.55
2020	60	148	92	0.45	0.55
2021	65	149	86	0.46	0.54
2022	66	149	85	0.47	0.53

Forest Y

Year	Genotype			Allele frequency	
	AA	Aa	aa	A	a
2013	0	0	300	0.00	1.00
2014	0	0	300	0.00	1.00
2015	0	0	300	0.00	1.00
2016	0	15	285	0.03	0.98
2017	3	46	251	0.09	0.91
2018	14	60	226		
2019	31	91	178	0.26	0.75
2020	48	104	148	0.33	0.67
2021	60	122	118	0.40	0.60
2022	66	137	97	0.45	0.55

a) Calculate the allele frequencies for forest Y in 2018. Show your working. [2 marks]

b) Identify temporal trends in allele frequency for forests X and Y and infer reasons for the observed differences. [6 marks]
