1 Course overview

1.1 Introduction

1.1.1 The language

The language to be studied and assessed is the modern standard version of Tamil.

Centuries of influence from other cultures and religions has resulted in numerous borrowings of words from other languages that have become an acceptable part of Tamil usage. Examples include புத்தகம் சின்னல் அலுமாரி. There are also common borrowings from English in fields such as music, science and technology. As a result of the scattering of Tamil speakers across the world, there are some marked variations in the spoken language. These variations may surface in different social situations and are acceptable, provided they occur in the appropriate context.

1.1.2 Rationale

The study of Tamil contributes to the overall education of students, most particularly in the area of communication, but also in the areas of cross-cultural understanding, cognitive development, and literary and general knowledge. It provides access to the culture of communities that use the language and promotes understanding of different attitudes and values within the wider Australian community and beyond.

Tamil is widely spoken in Southern India and Sri Lanka. It is also the language of many Tamils who have migrated to different parts of the world, including Malaysia and Singapore, and in more recent times Canada, France, Germany, the UK and Australia.

Tamil is one of the oldest languages in the world. The study of Tamil provides access to an important cultural and linguistic heritage.

Assumed knowledge, prior learning or experience

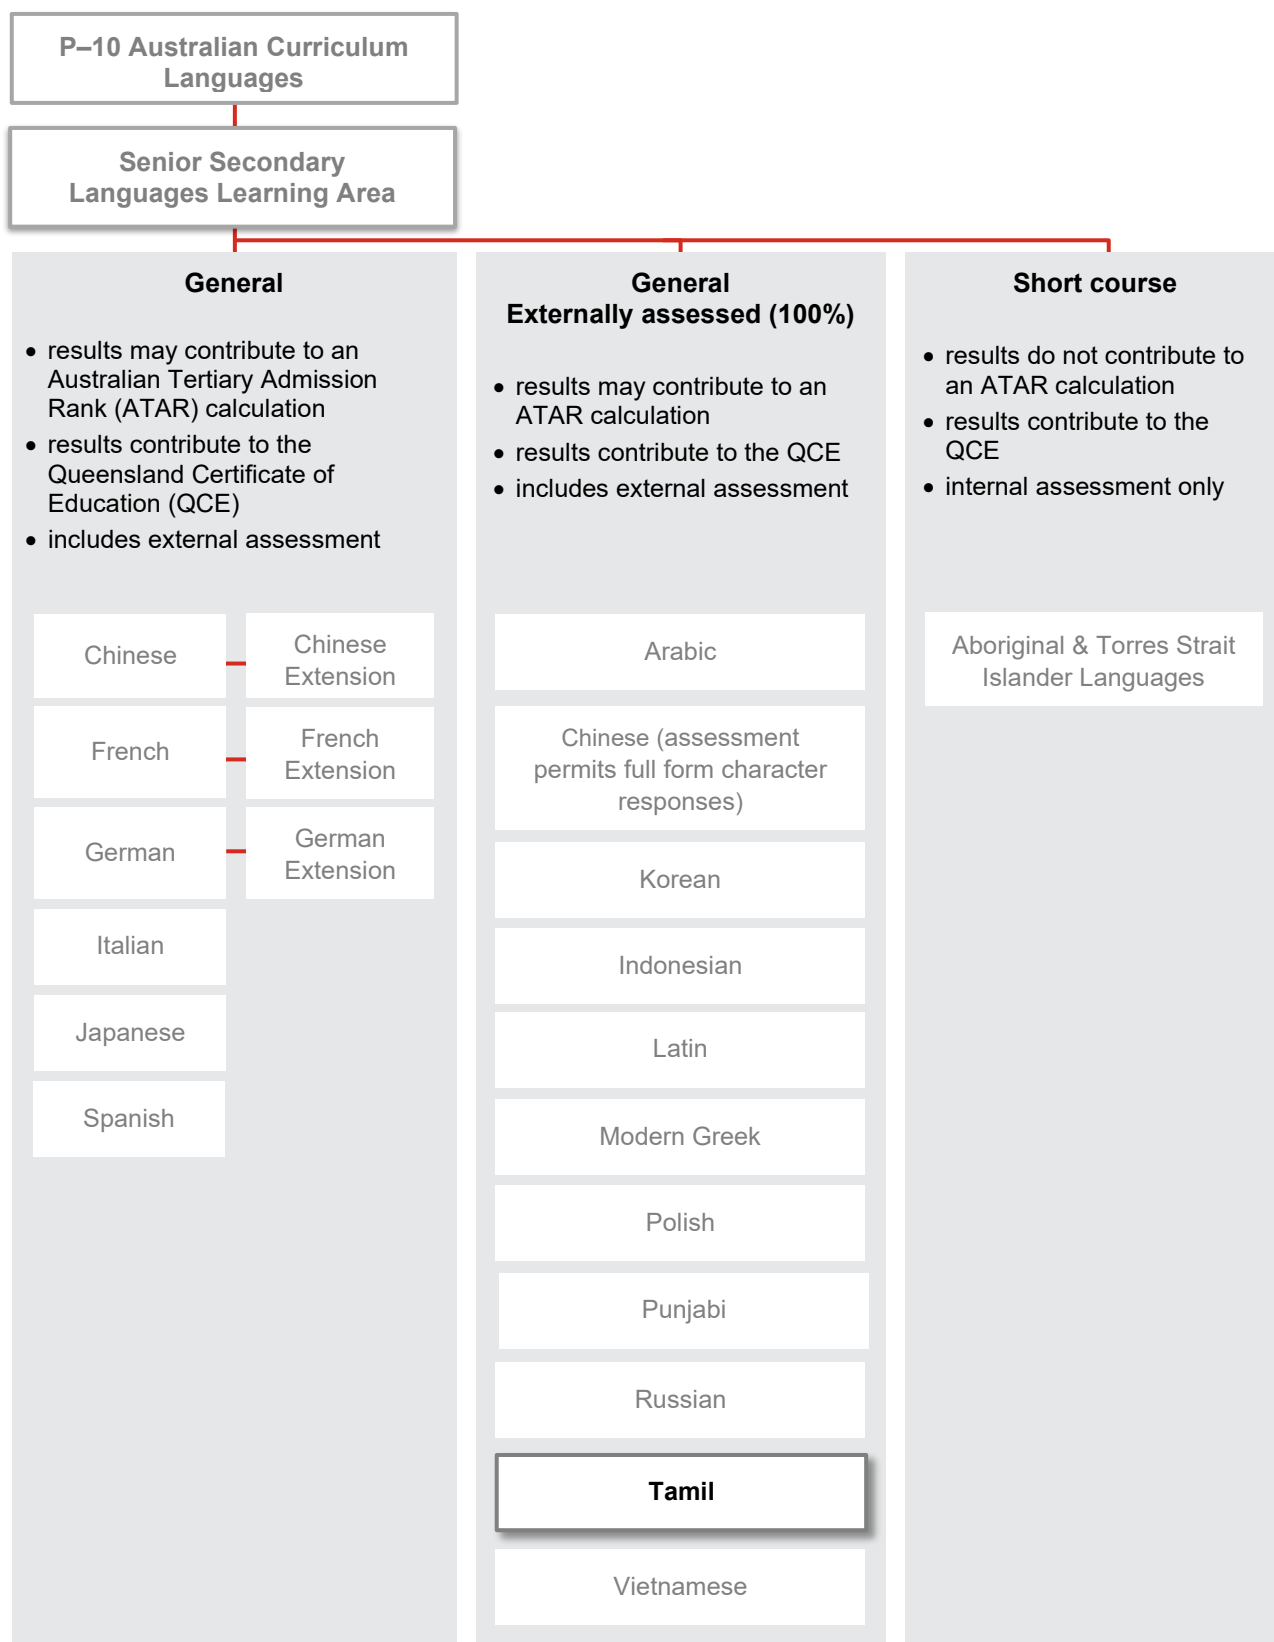

This syllabus is designed for candidates who wish to study Tamil and have studied Tamil prior to the commencement of this course. Other candidates with less formal language experience may also be able to meet the requirements of the syllabus successfully.

Pathways

Tamil is a General externally assessed subject suited to candidates who are interested in pathways that lead to tertiary studies, vocational education or work. A broad range of social, economic and vocational opportunities results from study in a second language. In conjunction with other skills, the ability to communicate in Tamil provides candidates with enhanced vocational opportunities in a variety of endeavours including opportunities for employment in the fields of translation, interpreting, banking and social services, tourism and hospitality, diplomacy and international relations, law, medicine, the arts and education.

1.1.3 Learning area structure

Figure 1: Learning area structure

1.1.4 Course structure

Tamil is a course of study consisting of four units. Subject matter, learning experiences and assessment should increase in complexity from Units 1 and 2 to Units 3 and 4. Each unit deals with language and specific content contained in the areas of study and is designed to enable candidates to achieve a set of objectives for that unit. Each objective is described in terms of the key knowledge and skills candidates are required to demonstrate.

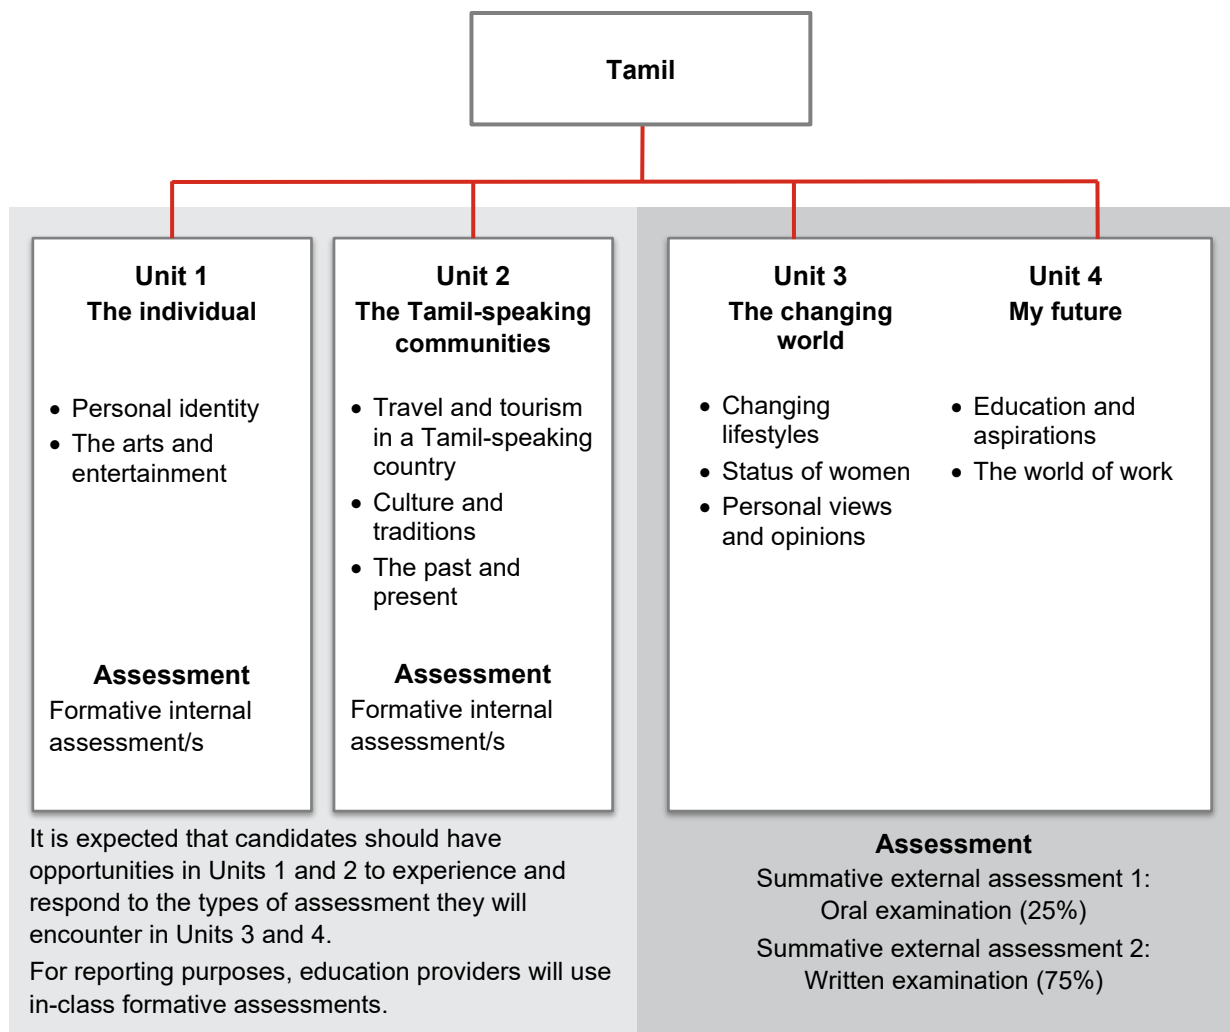

Units 1 and 2 provide foundational learning, which allows candidates to experience the syllabus objectives and begin engaging with the course subject matter. It is expected that candidates should complete Units 1 and 2 before beginning Unit 3. Units 3 and 4 consolidate candidate learning. Candidates should undertake Unit 3 prior to undertaking Unit 4.

Only the results from the oral and written external assessments conducted at the completion of Unit 4 will contribute to ATAR calculations.

Figure 2 outlines the structure of this course of study.

Each unit has been developed with a notional time of 55 hours of teaching and learning. Time allocation depends on the method of study. Candidates who elect to study without systematic tuition must organise their time according to syllabus requirements and individual circumstances.

Figure 2: Course structure

1.2 Teaching and learning

1.2.1 Syllabus objectives

The syllabus objectives outline what candidates have the opportunity to learn. Assessment provides evidence of how well candidates have achieved the objectives.

Syllabus objectives inform unit objectives, which are contextualised for the subject matter and requirements of the unit.

The student should be able to achieve the following objectives:

Objective 1: Exchange information, opinions and experiences in Tamil.

Objective 2: Express ideas through the production of original texts in Tamil.

Objective 3: Analyse, process and respond to texts that are in Tamil.

Objective 4: Understand aspects of the language and culture of Tamil-speaking communities.

Meeting these objectives will involve using the skills of listening, speaking, reading and writing, either individually or in combination, and being able to move between Tamil and English.

1.2.2 Underpinning factors

There are three skill sets that underpin senior syllabuses and are essential for defining the distinctive nature of subjects:

- literacy — the set of knowledge and skills about language and texts essential for understanding and conveying Tamil content
- numeracy — the knowledge, skills, behaviours and dispositions that candidates need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully
- 21st century skills — the attributes and skills candidates need to prepare them for higher education, work and engagement in a complex and rapidly changing world.

These skill sets, which overlap and interact, are derived from current education, industry and community expectations. They encompass the knowledge, skills, capabilities, behaviours and dispositions that will help candidates live and work successfully in the 21st century.

Together these three skill sets shape the development of senior subject syllabuses. Although coverage of each skill set may vary from syllabus to syllabus, candidates should be provided with opportunities to learn through and about these skills over the course of study. Each skill set contains identifiable knowledge and skills that can be directly assessed.

Literacy in Tamil

Literacy is the set of knowledge and skills about language and texts that is essential for understanding and conveying information in Tamil. Ongoing systematic teaching and learning focused on the literacy knowledge and skills specific to Tamil is essential for candidate achievement. This includes knowledge of the nature and structure of characters, with reasonable form, shape and proportion. Effective communication also requires knowledge of accurate spacing, punctuation, spelling conventions and written conventions.

Candidates need to learn and use the knowledge and skills of reading, viewing and listening to understand and acquire the Tamil language. Candidates need to learn and use the knowledge and skills of writing, composing and speaking to convey information in Tamil.

To understand and use literacy skills in Tamil, teaching and learning strategies include:

- comprehending language and texts to make literal and inferred meanings from Tamil texts
- using Tamil in educational settings, real-world and/or lifelike contexts to progress candidates' own learning.

To analyse and evaluate Tamil texts, teaching and learning strategies include:

- using Tamil to convey ideas and information in particular ways to suit audience and purpose
- analysing the ways language is used to convey ideas and information in Tamil texts
- drawing conclusions about the purpose and audience of Tamil texts.

These aspects of literacy knowledge and skills are embedded in the syllabus objectives, unit objectives and subject matter for Tamil.

Numeracy in Tamil

Numeracy is about using mathematics to make sense of the world and applying mathematics in a context for a social purpose.

Numeracy encompasses the knowledge, skills, behaviours and dispositions that candidates need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.

Although much of the explicit teaching of numeracy skills occurs in Mathematics, being numerate involves using mathematical skills across the curriculum. Therefore, numeracy development is an essential component of teaching and learning across the curriculum.

To understand and use numeracy skills in Tamil, teaching and learning strategies include:

- identifying specific mathematical information in Tamil texts
- providing learning experiences and opportunities that support the application of candidates' general mathematical knowledge and problem-solving processes
- communicating and representing the language of numeracy in teaching, as appropriate.

These aspects of numeracy knowledge and skills are embedded in the syllabus objectives, unit objectives and subject matter.

21st century skills

The 21st century skills identified in the following table reflect a common agreement, both in Australia and internationally, on the skills and attributes candidates need to prepare them for higher education, work and engagement in a complex and rapidly changing world.

21st century skills	Associated skills	21st century skills	Associated skills
critical thinking	<ul style="list-style-type: none"> analytical thinking problem-solving decision-making reasoning reflecting and evaluating intellectual flexibility 	creative thinking	<ul style="list-style-type: none"> innovation initiative and enterprise curiosity and imagination creativity generating and applying new ideas identifying alternatives seeing or making new links
communication	<ul style="list-style-type: none"> effective oral and written communication using language, symbols and texts communicating ideas effectively with diverse audiences 	collaboration and teamwork	<ul style="list-style-type: none"> relating to others (interacting with others) recognising and using diverse perspectives participating and contributing community connections
personal and social skills	<ul style="list-style-type: none"> adaptability/flexibility management (self, career, time, planning and organising) character (resilience, mindfulness, open- and fair-mindedness, self-awareness) leadership citizenship cultural awareness ethical (and moral) understanding 	information & communication technologies (ICT) skills	<ul style="list-style-type: none"> operations and concepts accessing and analysing information being productive users of technology digital citizenship (being safe, positive and responsible online)

Tamil helps develop the following 21st century skills:

- critical thinking
- communication
- personal and social skills
- creative thinking
- collaboration and teamwork
- information & communication technologies (ICT) skills.

These elements of 21st century skills are embedded in the syllabus objectives, unit objectives and subject matter for Tamil.

1.2.3 Aboriginal perspectives and Torres Strait Islander perspectives

The QCAA is committed to reconciliation in Australia. As part of its commitment, the QCAA affirms that:

- Aboriginal peoples and Torres Strait Islander peoples are the first Australians, and have the oldest living cultures in human history
- Aboriginal peoples and Torres Strait Islander peoples have strong cultural traditions and speak diverse languages and dialects, other than Standard Australian English
- teaching and learning in Queensland educational settings should provide opportunities for candidates to deepen their knowledge of Australia by engaging with the perspectives of Aboriginal peoples and Torres Strait Islander peoples
- positive outcomes for Aboriginal candidates and Torres Strait Islander candidates are supported by successfully embedding Aboriginal perspectives and Torres Strait Islander perspectives across planning, teaching and assessing candidate achievement.

Guidelines about Aboriginal perspectives and Torres Strait Islander perspectives and resources for teaching are available at www.qcaa.qld.edu.au/k-12-policies/aboriginal-torres-strait-islander-perspectives.

Languages foster and sustain cultures, identities and communities. Through the study and acquisition of an additional language, candidates learn to value other identities and cultures as well as their own.

As the custodians of Australia's first languages, Aboriginal peoples and Torres Strait Islander peoples are important members of the Australian community, whose cultures and perspectives have been sustained for over 50 000 years. For learners of Tamil, study that recognises the diversity and specificity of Aboriginal identities and Torres Strait Islander identities — through histories, traditional and contemporary cultures, lifestyles and values — provides further insight into the complexity and uniqueness of Australian identity in the present day.

When learning Tamil, the context of the local area and community must be considered. The place of Aboriginal cultures and languages and Torres Strait Islander cultures and languages should be acknowledged, and authentic connections to Aboriginal communities and Torres Strait Islander communities made. Candidates can explore Aboriginal perspectives and Torres Strait Islander perspectives in a number of contexts, such as lifestyle, leisure, travel, roles and relationships, and groups in society.

1.2.4 Pedagogical and conceptual frameworks

Language acquisition occurs in communicative contexts: communication encompasses the exchange and negotiation of meaning, drawing on awareness of intercultural understanding and cultural conventions.

Candidates acquire language through the purposeful and meaningful use of that language. Exchanges of information and ideas are authentic and relevant; candidates practise receptive, interactive and productive exchanges of information in communicative and age-appropriate contexts. Through engagement with a range of Tamil texts, candidates will demonstrate communicative and cognitive facility and a capacity to create and comprehend texts in Tamil.

The syllabus objectives for Tamil are interrelated and interdependent. They reflect the nature of Tamil language acquisition in a communicative and cultural context. To effectively engage candidates in exchanging ideas, information and opinions, the teaching and learning experiences for Tamil need to encompass a variety and range of modes, media and formats. Candidates are encouraged to interact in Tamil as the language of the educational setting. Active language use,

in a variety of meaningful everyday situations and contexts, fosters an understanding and appreciation of Tamil language, culture and their interrelationships.

Teaching and learning experiences should support candidate engagement. Exchanges in and engagement with Tamil are meaningful when teaching and learning experiences allow for:

- retrieval of knowledge of language elements, grammatical items and textual conventions to understand and create texts
- consideration of context and cultural conventions to construct and engage with a range of written, spoken and visual text types
- development and organisation of information in a cohesive manner to communicate, explain and transmit ideas, and demonstrate intercultural understanding
- synthesis of knowledge and skills to generate and sustain the exchange of meaning
- use of linguistic, textual and cultural knowledge for the analysis and creation of texts
- interpretation, analysis, comparison and evaluation of information and ideas to draw conclusions and justify opinions in responding to texts
- identification of information, ideas and textual elements to develop points of view
- recognition and appreciation of variations within languages that reflect cultural and community diversity.

Education providers and candidates should develop learning experiences that allow candidates the opportunity to:

- analyse texts
- create texts
- exchange information and ideas.

These opportunities should cover unit objectives contextualised to the subject matter and requirements of each unit.

Education providers and candidates should ensure that there is a balance of:

- modes
- subject matter
- objectives.

Candidates should engage with:

- listening, reading and viewing, with responses to
 - short items in English and Tamil
 - extended responses, paragraphs and/or short sentences in English and/or Tamil
- speaking and writing, with responses
 - in a wide variety of text types for each mode
 - across the different media or forms of technology, where possible
 - in Tamil to Tamil stimulus texts
- exchanges of information in Tamil.

In this way, each candidate develops their capacity to listen, read, speak, view and write in Tamil. Because candidates develop the capacity to listen, read, speak, view and write in Tamil unevenly, it is important that opportunities to demonstrate analysis, evaluation, drawing conclusions and justifying opinions, ideas and perspectives be provided through responses in both English and Tamil.

Education providers or candidates develop a course of study that balances learning and assessment so that candidates can easily move between the experiences in an educational setting and assessment of those experiences. This will allow education providers or candidates to identify the most appropriate ways to improve language acquisition and monitor individual performance in relation to the syllabus objectives.

Use of dictionaries

Dictionaries are an important tool in the acquisition of a language. Knowing how to use a dictionary is a necessary skill for learners of a language. The use of a dictionary is one of the problem-solving strategies employed by language learners and is useful for mediating conceptual meaning. Dictionaries may also be used for confirming literal meaning where a word or phrase is not known by a candidate. Dictionaries are important for maintaining communication in exchanges of information, but their use should not hinder or impede the immediacy and spontaneity of an exchange.

Vocabulary

While there is no prescribed vocabulary list, it is expected that candidates will be familiar with a range of vocabulary and idioms relevant to the topics prescribed in the course of study. Candidates should be encouraged to use dictionaries. It is expected that teachers will assist candidates to develop the necessary skills and confidence to use dictionaries effectively.

Information on the use of dictionaries in the end-of-year examinations is provided in Section 5.

1.3 Subject matter

Subject matter is the body of information, mental procedures and psychomotor procedures (see Marzano & Kendall 2007, 2008) that are necessary for candidates' learning and engagement with Tamil. It is particular to each unit in the course of study and provides the basis for candidate learning experiences. Subject matter has a direct relationship to the unit objectives, but is more specific.

Candidates acquire Tamil through engagement with the subject matter — expressed as key knowledge and skills — using the mandatory grammatical items to respond to and create texts in relation to the unit themes and topics.

The subject matter and assessment in this syllabus requires candidates to use Tamil. This is an iterative process. Across the four units, candidates should be given the opportunity to understand and create a wide range of text types.

Resources related to subject matter should support a candidate's acquisition of Tamil and understanding of the culture of Tamil people and Tamil-speaking communities. Therefore, resources and stimulus texts should be authentic; however, texts may be adapted for use in the educational setting to allow candidates access to ideas and information where expressions are beyond the language acquisition level of a cohort.

An integrated approach to teaching subject matter should be incorporated into the analysis and creation of texts in Tamil. In a communicative language acquisition course, language elements and grammatical items should not be taught discretely, but should be integrated into the creation and analysis of Tamil texts.

A candidate's acquisition of communicative Tamil will allow the cumulative engagement with subject matter to be demonstrated through analysis and evaluation of ideas and information in texts and through the creation of texts that convey and exchange meaning.

Unit duration is provided as advice for educational settings or candidates to inform the depth and balance of coverage of each topic. Examples are provided as guidance for resource selection and are not exhaustive.

While education providers may use in-class formative assessment addressing specific topics, it is expected that candidates will demonstrate their knowledge and skills in the external assessment.

1.3.1 Organisation of subject matter

There are three prescribed themes:

- The individual
- The Tamil-speaking communities
- The changing world.

Each of these themes has a number of prescribed topics, with some suggested sub-topics. All of the themes and topics are to be studied over the course of Units 1–4. The placement of topics under one or more of the three themes is intended to provide a particular perspective or perspectives for each of the topics. The suggested sub-topics expand on the topics and are provided to guide candidates and teachers on how the topics may be treated.

The following table shows the prescribed themes, prescribed topics and suggested sub-topics.

The individual	The Tamil-speaking communities	The changing world
<p>Topic: Personal identity Suggested sub-topics:</p> <ul style="list-style-type: none"> • personal details and qualities • family and friends • daily life • free time and leisure activities • relationships. 	<p>Topic: Culture and traditions Suggested sub-topics:</p> <ul style="list-style-type: none"> • family values • attire and appearance • social interaction • festivals and ceremonies. 	<p>Topic: Changing lifestyles Suggested sub-topics:</p> <ul style="list-style-type: none"> • family life • food • care of children/the aged • activities (children, parents).
<p>Topic: Personal views and opinions Suggested sub-topics:</p> <ul style="list-style-type: none"> • views on the future • cultural differences • personal priorities/preferences (extended family living away from home). 	<p>Topic: The past and present Suggested sub-topics:</p> <ul style="list-style-type: none"> • famous persons and events • places of historical importance. 	<p>Topic: Status of women Suggested sub-topics:</p> <ul style="list-style-type: none"> • the role of women depicted in literature • significant women in the 20th century • the changing role of women and its impact on society.

	<p>Topic: Travel and tourism in a Tamil-speaking country Suggested sub-topics:</p> <ul style="list-style-type: none"> • travel • banking • shopping • health • obtaining assistance and advice • visiting friends • studying in a Tamil-speaking country 	

The four units in this course of study have been designed to encompass these prescribed themes and topics.

It is not expected that all topics will require the same amount of study time. The length of time and depth of treatment devoted to each topic will vary according to the objectives being addressed, as well as the linguistic needs and interests of the candidate.

1.3.2 Common areas of study (Units 1–4)

The areas of study for Tamil comprise themes and topics, text types, kinds of writing, vocabulary and grammar. They are common to all four units of the course of study, and they are designed to be drawn upon in an integrated way, as appropriate to the linguistic needs of the candidate and the objectives for the unit.

The themes and topics within each unit are the vehicles through which the candidate will demonstrate achievement of the objectives, in the sense that they form the basis of the activities and tasks the candidate undertakes.

The mandatory grammatical items, text types and kinds of writing are linked, both to each other and to the themes, topics and sub-topics, and are common to all four units of the study. They are designed to be drawn upon in an integrated way, as appropriate to the linguistic needs of the candidate and the objectives for the unit.

1.3.3 Detailed study

As well as acquiring the linguistic resources to function effectively as a non-specialist within all three themes, candidates are required to undertake a detailed study of language and culture through texts during Units 3 and 4.

This detailed study should relate to the prescribed themes and topics for Units 3 and 4 and be based on a selected sub-topic.

Candidates will be expected to discuss their detailed study in Section 2: Discussion of the oral examination.

Over the course of Units 3 and 4, approximately 15 hours of scheduled class time should be devoted to the detailed study.

The detailed study should be based on a sub-topic related to one or more of the prescribed topics listed in the table above (Section 1.3.1). The sub-topic may be drawn from this table, or a different sub-topic may be selected.

One sub-topic may be selected for a whole class or different sub-topics may be selected for individuals or groups of candidates. In the former case, it is important to select a sub-topic that is sufficiently broad to accommodate a range of interests and perspectives, so that each candidate can provide an individual response in the discussion in Section 2 of the oral examination.

The detailed study assesses the candidate's understanding of the language and culture of the Tamil-speaking community. The selected sub-topics and texts should ensure the candidate is able to focus on the knowledge and skills associated with Objectives 1 and 4.

Suggested sub-topics for detailed study

The following topics and sub-topics have been broken down to include suggested areas that might form the focus of a detailed study. Teachers may wish to focus on one of these areas and expand it to include further areas, or they might choose to incorporate all areas, depending on how closely they can be linked.

Theme: The individual
Topic: Personal identity
Suggested sub-topics for detailed study: <ul style="list-style-type: none">• personal details and qualities• family and friends• daily life• free time and leisure activities• relationships.

- activities (children, parents).

Topic: Status of women

Suggested sub-topics for detailed study:

- the role of women depicted in literature
- significant women in the 20th century
- the changing role of women and its impact on society.

Topic: World of work

Suggested sub-topics for detailed study:

- different types of work
- workplace conditions
- overseas employment opportunities.

Language and culture through texts

The detailed study should enable the candidate to explore and compare aspects of the language and culture of the Tamil-speaking community through a range of oral and written texts related to the selected sub-topic. This will enable the candidate to develop knowledge and understanding of historical issues, aspects of contemporary society or the literary or artistic heritage of the community.

The texts that form the basis of this study might include feature films, short films, short stories, songs, newspaper articles, electronic texts, documentaries, music, painting and oral histories. The length of texts selected will vary depending on the type of text, their density and level of complexity. In order for the candidate to be able to explore their sub-topic in sufficient depth to meet the relevant objectives, it is suggested that a range of at least three different kinds of text are selected. These might include aural and visual texts, as well as written texts.

1.3.4 Text types

In their teaching, learning and assessment programs, teachers should introduce candidates to a wide range of text types. Text types for receptive use in teaching, learning and assessment are not prescribed.

In the external examination, the following text types are prescribed for productive use: article, blog, diary/journal entry, email, letter (formal or informal), text of an interview, message, note, report, review, script of a play, script of a speech or talk, story.

Main characteristics of common text types

1.3.5 Kinds of writing

Candidates are expected to be familiar with, and be able to produce, different kinds of writing, such as personal, imaginative, persuasive, informative, evaluative, reflective, narrative or descriptive, either individually or in combination.

The following descriptions outline the main characteristics of five different kinds of writing. They are intended as a guide only; candidates would not be expected to include all aspects in their writing.

Personal writing

- creates a sense of person/personality for the writer in the reader's mind
- establishes a relationship/intimacy/empathy between the writer and the reader
- usually employs first and/or second person; subjective; informal, familiar style/register; often includes emotive language
- emphasises ideas, opinions, feelings and impressions, rather than factual, objective information
- uses, in reflective writing, the act of writing to help the author understand and unravel their own feelings or ideas
- may, in certain contexts, use contracted language, such as is used in speech.

Imaginative writing

- manipulates the reader's response to the piece to create the desired impression or response; visual and/or emotional appeal
- usually creates a strong sense of context (physical surroundings and atmosphere) and situation
- normally includes description (person, place, emotion, atmosphere), so careful selection of language, such as adjectives and adverbs (or their equivalents), is important
- uses techniques, such as variation in sentence length, juxtaposition of different sentence lengths, careful control of structure and sequencing, to add to the overall effect by creating the desired atmosphere or conveying the required emotion
- may break normal sequencing for added impact, such as in a flashback or final disclosure, which puts a different interpretation on preceding passages.

Persuasive writing

- manipulates the reader's emotions and opinions to achieve a specific purpose, that is, to achieve a desired outcome or effect that is important to and selected by the writer
- is strongly influenced by the nature of the target audience in choosing the persuasive techniques to adopt; that is, the language (vocabulary, sentence structures, style/register), structure and sequencing of the piece are framed with the particular audience and purpose in mind
- requires choice of the best word (with the precise shade of meaning and overtones of approval/disapproval, virtue/vice etc.), so range of vocabulary and dictionary technique are important

- aims in certain instances (e.g. advertisements) to keep the target audience unaware of being manipulated and adopts an appearance of objectivity and rationality by using indirect, subtle, secretive techniques; and confidential, intimate, collaborative style and register
- sometimes uses exaggeration, extravagant language and humour to create a conspiratorial relationship between the writer and reader
- often uses the second person for direct address and appeal
- sometimes employs direct speech and questions to intensify the relationship with the audience
- may use techniques, such as technical or scientific language and superlatives or quantitative statements, to lend authority to the content.

Informative writing

- aims to convey information from the writer to the reader as clearly, comprehensively and accurately as possible
- usually uses objective style and impersonal expressions, although the writer may use an informal style to establish a relationship of 'friendly helper' with the reader
- normally has no particular point of view to convey; if a point of view is involved, the writing becomes either persuasive (aiming to convert the reader to a particular point of view or attitude to convince them to act or respond in a certain way) or evaluative (aiming to weigh two or more items/ideas to convince the reader rationally and objectively that a particular point of view is correct)
- generally uses facts, examples, explanations, analogies and sometimes statistical information, quotations and references as evidence
- chooses language, structure and sequence to make the message clear and unambiguous, so the sequencing of information is usually logical and predictable
- probably uses few adjectives, adverbs and images, except as examples or analogies in explanation.

Evaluative writing

- aims to reach a conclusion acceptable to an intelligent, unbiased reader through the logical presentation and discussion of facts and ideas
- presents two or more important aspects of an issue or sides of an argument and discusses these rationally and objectively, using evidence to support the contrasting sides or alternatives
- uses objective style; appeals to reason not emotion; creating an impression of balance and impartiality is essential
- often includes expressions of cause, consequence, opposition and concession.

1.3.6 Mandatory grammatical items

Grammar can be described as the organisation and relationship of all the elements that constitute a language as it functions.

There are many different theories of grammar and a number of different approaches to its teaching and learning. The categories used in the table below are not intended to promote or favour any particular theory of grammar.

Students will already have a reasonable understanding of the function of grammar in Tamil through prior knowledge or study. Developing students' ability to convey meaning effectively in a range of contexts will, however, necessarily involve extending their awareness of the system of structures that underlie the language, as well as their ability to apply and adapt this knowledge.

Students studying Tamil in a continuers-level program are expected to recognise and use the following grammatical structures:

1.3.7 Text selection

Text selection is an education provider based decision and should reflect the interests and needs of candidates.

Throughout the course of study, candidates should be provided with opportunities to engage with a wide range of texts to encourage their development as language learners and users. Texts selected for the course of study may be analytical, descriptive, informative, narrative, persuasive, satirical and comedic or transactional texts.

There should be a range and balance in the texts that candidates read, listen to and view, which embody the intercultural nature of language. The course should include texts designed for different purposes and audiences, and delivered through different media.

1.4 Assessment — general information

Assessment	Unit 1	Unit 2	Unit 3	Unit 4
Formative assessments	•	•		
Summative external assessment 1 (Oral examination)			•	•
Summative external assessment 2 (Written examination)			•	•

1.4.1 Formative assessments — Units 1 and 2

The sequencing, scope and scale of formative assessments are matters for each education provider or individual candidate to decide. If this syllabus is delivered in a school setting, teachers are encouraged to use the A–E descriptors in the reporting standards to provide formative feedback to candidates and to report on progress.

1.4.2 Summative assessment — Units 3 and 4

Candidates will complete a total of **two** summative external examinations at the end of the year, after the completion of the course of study. Both examinations together will determine the candidate's result in this subject.

The summative external assessment provides the evidence of achievement for a candidate's profile.

External assessment is:

- common to all candidates
- administered under the same conditions at the same time and on the same day
- held in either October or November of each year.

The oral and written examinations will be set by a panel appointed by the Victorian Curriculum and Assessment Authority (VCAA) and marked by a panel of assessors appointed by the VCAA.

The format for the external examinations is determined by the Collaborative Curriculum and Assessment Framework for Languages (CCAFL), which is a national model for the teaching, learning and assessment of language subjects with small candidatures.

The end-of-year examinations are:

- an oral examination
- a written examination.

The examinations will test a representative sample of the relevant key knowledge and key skills from Units 3 and 4.

The external assessment results will contribute 100% towards a candidate's result in Tamil.

1.5 Reporting standards

Reporting standards are summary statements that succinctly describe typical performance at each of the five levels (A–E). They reflect the cognitive taxonomy and objectives of the course of study.

The primary purpose of reporting standards is for twice-yearly reporting on candidate progress. These descriptors can also be used to provide formative feedback to candidates.

2 Unit 1: The individual

2.1 Unit description

In Unit 1, candidates consider and reflect on their own and others' personal worlds — their everyday life and relationships with family and friends. They communicate their understanding and experiences of relationships through the use of information and ideas in texts and language, such as formal and informal spoken language, and develop a variety of strategies to maintain communication.

The unit provides candidates with opportunities to think about their interests and how they spend their leisure time, to explore options, and to compare and contrast lifestyles in Australian and Tamil-speaking communities, and the associated cultural values. Candidates also look at developments in the world of arts and entertainment — exploring film and TV, art and architecture, and music and song, both in Tamil-speaking communities and in Australia.

The subject matter engages candidates with aspects of language and textual conventions by requiring them to establish and maintain a written or spoken exchange related to personal areas of experience; listen to, read and obtain information from written and spoken texts; and produce a personal response to a text that focuses on a real or imaginary experience.

2.5 Assessment guidance

If this syllabus is delivered in an educational setting, providers should ensure that the objectives cover, or are chosen from, the unit objectives. If one formative assessment instrument is developed for a unit, it must assess all the unit objectives; if more than one formative assessment instrument is developed, the unit objectives must be covered across those instruments.

Candidates should be able to demonstrate their ability across the unit objectives, prescribed unit topics, suggested sub-topics and mandatory grammatical items.

3 Unit 2: The Tamil-speaking communities

3.1 Unit description

In Unit 2, candidates move beyond their personal world to engagement with the Tamil-speaking world. They explore options for personal travel and tourism in Tamil-speaking communities and Australia, and consider the associated cultural mores and conventions.

The unit provides candidates with opportunities to recognise and investigate places of interest to Tamil-speakers, to consider conversations related to travel experiences, and to compare and contrast the travel and tourism highlights of Tamil-speaking communities with Australian destinations.

They also compare lifestyles between these communities and Australia, looking at traditional social structures, the differences between rural and urban lifestyles, cultural diversity and activities particular to Tamil-speaking communities. Tamil life is examined from historical and contemporary perspectives. This includes looking at notable people; important historical and religious events, festivals and ceremonies; and stories from the past that help define the Tamil-speaking people, their culture and traditions.

Candidates reflect upon their experiences, compare options and express preferences, while appreciating diverse cultural values. This provides the opportunity to develop knowledge and understanding of a range of language elements, grammatical items and textual structures; to communicate similarities and differences; to develop and express personal opinions; and to reinforce the link between language, culture and identity.

The subject matter engages candidates with aspects of language and textual conventions by requiring them to participate in a written or spoken exchange related to making arrangements and completing transactions; listen to, read, extract and use information and ideas from spoken and written texts; and give expression to real or imaginary experience in written or spoken form.

This will enable the candidate to develop knowledge and understanding of historical issues, aspects of contemporary society or the literary or artistic heritage of the community.

The texts that form the basis of this study might include feature films, short films, short stories, songs, newspaper articles, electronic texts, documentaries, music, paintings and oral histories. The length of texts selected will vary depending on the type of text, their density and level of complexity. For the candidate to be able to explore their sub-topic in sufficient depth to meet the relevant objectives, it is suggested that a range of at least three different kinds of text are selected. These might include aural and visual texts, as well as written texts.

The selected sub-topics and texts should ensure the candidate is able to focus on the knowledge and skills associated with Objectives 1 and 4.

4.2 Unit objectives

This includes plans for their immediate future and how these plans, responsibilities and aspirations compare with those of other young people in Tamil-speaking communities.

The unit provides candidates with opportunities to examine the world of work, employment and unemployment, and the changing roles of men and women, not only in the workforce, but also in the modern world. Candidates have opportunities to use Tamil to consider and discuss their perspectives on issues relevant to their futures and the futures of their peers, both in Australia and in Tamil-speaking communities. As they research, examine and discuss a range of texts, and create oral and written texts, candidates consolidate their knowledge and understanding of a range of language elements, grammatical items, structures and text types.

As candidates consider the next phase of their lives and their aspirations, they reflect on their personal world, identity, school and home life, family, friends and interests, and the past and present influences on their world. They compare and contrast customs, and the social and cultural values related to their personal lifestyle and to wider community lifestyles, leisure and education, both in Australia and in Tamil-speaking communities. They also consider historical issues, aspects of contemporary society, the literary and artistic heritage of the community, and aspects of the language and culture of Tamil-speaking communities.

The detailed study should be based on a sub-topic related to one or more of the prescribed topics listed in the table in Section 1.3.1. The sub-topic may be drawn from this table or a different sub-topic may be selected.

The detailed study assesses the candidate's understanding of the language and culture of the Tamil-speaking community. It should enable the candidate to explore and compare aspects of the language and culture of the Tamil-speaking community through a range of oral and written texts related to the selected sub-topic. This will enable the candidate to develop knowledge and understanding of historical issues, aspects of contemporary society or the literary or artistic heritage of the community.

The texts that form the basis of this study might include feature films, short films, short stories, songs, newspaper articles, electronic texts, documentaries, music, paintings and oral histories. The length of texts selected will vary depending on the type of text, their density and level of complexity. For the candidate to be able to explore their sub-topic in sufficient depth to meet the relevant objectives, it is suggested that a range of at least three different kinds of text are selected. These might include aural and visual texts, as well as written texts.

The selected sub-topics and texts should ensure the candidate is able to focus on the knowledge and skills associated with Objectives 1 and 4.

The format for the external examinations is determined by the Collaborative Curriculum and Assessment Framework for Languages (CCAFL), which is a national model for the teaching, learning and assessment of language subjects with small candidatures.

The external assessment is held in either October or November of each year.

The oral and written examinations will be set by a panel appointed by the Victorian Curriculum and Assessment Authority (VCAA), and marked by a panel of assessors appointed by the VCAA.

5.5.2 Summative external assessment 2: Written examination (75%)

Conditions

- Time: 2 hours and 30 minutes, plus 10 minutes reading time.
- Candidates may use monolingual and/or bilingual print dictionaries in one or two volumes in the written examination.

The written examination has three sections.

Section 1: Listening and Responding

Purpose

Section 1 of the written examination is designed primarily to assess the student's knowledge and skill in analysing information from spoken texts. It relates to Objective 3.

The student will be expected to demonstrate understanding of general and specific information from spoken texts and to respond, in English in Part A and in Tamil in Part B, to questions on this information. The questions may require the student to identify information related to:

- the context, purpose, and audience of the text;
- aspects of the language of the text (e.g. tone, register, knowledge of language structures).

Specifications

Section 1 of the written examination has two parts, Part A and Part B. The texts in both parts will be related to one or more of the prescribed themes.

The student will hear six texts in Tamil covering a number of text types. The total listening time, for one reading of the texts without pauses, will be approximately 8 minutes (16 minutes in total for two readings of each text).

Some texts will be short; that is, one reading of each text will be approximately 35 to 45 seconds. Some texts will be longer; that is, one reading of each text will be approximately 90 to 120 seconds. Each text will be heard twice. There will be a pause between the first and second readings in which the student may take notes. The student will be given sufficient time after the second reading to complete answers.

The student will be expected to respond to a range of question types, such as completing a table, chart, list, or form, or responding to a message, open-ended questions, or multiple-choice items.

Part A

There will be three texts, including at least 1 shorter text and at least 1 longer text.

Questions on the texts will be written in English for answers in English.

Part B

There will be three texts, including at least 1 shorter text and at least 1 longer text.

Questions on the texts will be written in English and Tamil for answers in Tamil.

Section 2: Reading and Responding

Purpose

Section 2 of the written examination is designed primarily to assess the student's knowledge and skill in analysing information from written text, and in analysing and exchanging information in response to a text. It relates to Objectives 1 and 3.

In Part A, the student will be required to demonstrate understanding of written text. The student may be required to extract, summarise, and/or evaluate information from one or two texts. The student may be required to respond critically to the text/s and where there are two texts, to compare and/or contrast aspects of both texts.

In Part B, the student will be expected to demonstrate both an understanding of a written text and the ability to exchange information, by responding in Tamil to information provided in the text.

Specifications

Section 2 of the written examination has two parts, Part A and Part B. The texts in both parts will be related to one or more of the prescribed themes.

Part A

The student will be required to read one or two texts in Tamil of approximately 400 words in total. Where there are two texts, the texts will be different in style and purpose but may be related in subject matter or context.

Questions on the texts will be written in English for answers in English.

Part B

The student will be required to read approximately (150 words) in Tamil. The student will be required to demonstrate understanding of the text through processing the information from the stimulus material. The student will produce a written response that addresses the purpose, a context, and an audience as specified in the question. The student will be required to produce a text type drawn from those prescribed for productive use in the syllabus.

The student will be expected to write a response of approximately 150 words in Tamil.

One or two related texts may be used in the stimulus text. However, if two texts are used (for example, an attachment within an email) they must be presented as one text with two parts in the examination.

The question will be written in English and Tamil for a response in Tamil.

Section 3: Writing in Tamil

Purpose

Section 3 of the written examination is designed primarily to assess the student's ability to express ideas through the production of original text in Tamil. It relates to Objective 2.

Specifications

The student will be required to write a text involving the presentation of ideas and/or information and/or opinions. There will be a choice of two to four questions, which will be related to one or more of the prescribed themes. Questions will accommodate a range of student interests and will be set to ensure that the student is given opportunities to produce different kinds of writing (e.g. personal, informative, imaginative, evaluative, reflective, narrative, persuasive, or descriptive, either individually or in combination) by, for example:

- having different purposes, audiences, and contexts;
- requiring different text types (see the list of text types for productive use).

The student will be expected to write a response of approximately 250 words in Tamil.

The questions will be written in English and Tamil for a response in Tamil.

Assessment criteria
